

# DICTIONARY OF TURKISH ROOTS IN WESTERN LANGUAGES

## Full English Version

**Kaan Arslanoğlu**

**December 15, 2023**

Dedicated to **Norm Kisamov**

### **Revised and expanded version (January 2, 2024)**

This latest version of the dictionary is entirely written in English. While the previous version had some English sections, the Turkish sections were more predominant, making it challenging for those who do not know Turkish to read and examine. This issue has now been overcome.

This dictionary is the most comprehensive of my works in this area. In the previous version, I provided around 7,000 examples of words from Western languages in about 2,400 entries. Here, there are over 10,000 examples in 2,639 items. When considering all the words related to them, it is an overview of around 20,000 words. It emerged as a result of scanning the sources of about 300 authors, but the sources are so abundant... This is still an ongoing and endless examination.

The words are mostly **English**, **Latin**, and **German**. These are followed by **Celtic**, **Greek** and **French words**. Then Italian, Spanish...

The previous version was quite a mixed and messy text. Turkish and English parts created repetitions. There were also numerous editorial errors. I

apologize to those who downloaded and read the previous version for this reason. However, my intention at that time was to compile all the material I had and share it with readers and writers. Thus, opening up each entry for discussion. In this way, different views would emerge, contributions would be made, and my mistakes would be pointed out. The text received a lot of interest, thank you, but the feedback was minimal. Contributions were not substantial. There were very few objections to significant errors, and warnings to correct mistakes were almost non-existent. Still, I believe I achieved my goal to some extent.

This latest version, like the previous one, is open to discussion. However, I think I have now written my explanations and opinions more clearly. I have written the entries more accurately. It has become a text where I expect more challenges than discussions. I hope content errors and editorial mistakes have significantly decreased. Nevertheless, I am open to warnings and criticisms.

The majority of words overwhelmingly reveal the influence of Turkish roots in Western languages. While a small part of them are still controversial and some require further development. **Nevertheless, setting aside the ten thousand words, if a relationship is discerned within a mere 500 words, it calls for a comprehensive reevaluation of global linguistics.** This dictionary stands as a definitive refutation of the unscientific, colonialist Indo-European theory. Despite the multi-faceted, conclusive, and abundant evidence, some persist in repeating the 'random similarity' cliché. This repetition continues, as they lack alternatives in the realm of scientific discussion. Whether due to severe social mental retardation or ideological bigotry, the result is the same, racism or stupidity, both being equally detrimental. Please do not perceive any offense or

insult here; unfortunately, what I express here is my philosophical view on humanity.

Another challenge lies in the racist prejudices held by the majority of Turkish academics against Turks. The lack of social intelligence in various fields and admiration for strength intertwine, causing significant troubles for humanity. The fight against bigotry is a shared duty for individuals like us.

Ask any competent mathematician or statistician without a preconceived understanding of linguistics: How many words should be the same in meaning and sound between two languages, so that this is no longer considered a coincidence? Any mathematician unencumbered by traditional linguistic clichés will likely provide a similar answer. Let's not speculate, these calculations and discussions occurred in the field of linguistics half a century ago. For some, 100 similar words are conclusive proof of commonality. Certain authors argue that 7 words pairs suffice for full root partnership (Swadesh, Greenberg, Bender, Cowan). In this dictionary, we discuss hundreds of word pairs and thousands of overlaps.

The demonstrating the strong influence of Turkish or any other language, such as Arabic or Hebrew, on European languages (as this dictionary does once again) fundamentally challenges the prevailing understanding of Western linguistics. Suppose Turkish borrowed these common words from other languages 1500-2000 years ago; in that case, Turkish belongs to the same language family. And this is signifying the collapse of the Western linguistic paradigm and the fairy tale of language families. But this is only the first aspect of the issue.

**The second aspect involves registering Turkish as a founding language for Western languages.** I wish we could make these arguments with purely

academic motives. Nationalism, while not shameful unless descending into fanaticism, has never been my primary motivation. The real ultra-nationalists are colonialists disguised in liberal and democratic masks, distorting facts about disempowered nations. We cannot allow the deactivation of objective information through accusations of nationalism.

**Why is the Turkish a root language?** In this glossary, we broadly cover Western etymologists' explanations for Western words. Out of desperation, they were drowned in falsification. They try to analyze the world's languages ignoring the Turkish deliberately. They come to many wrong conclusions.

1- All their theses are in vain when we put their common words from **Sumerian, Hittite, Akkad** and **Etruscan**. The closest partner of these ancient languages is Turkish. You will find examples from all these languages in most of the words we examine in this dictionary. If there is a common word between Turkish and Persian, it is automatically interpreted as a borrowing of Turkish from Persian. However, when we find a common root in Sumerian, Hittite or Akkadian forming a cluster in Turkish, the Persian claim does not disappear, but becomes weaker.

2- When we show many examples from the **Native American languages** about the same commonalities, that separated from the continent 20 thousands years ago, the question of which language was the main root finds a definite answer. For example, let's say a word is common in Latin, Greek and Turkish. What do they say reflexively: "Turkish and Latin borrowed this word from Greek". However, if this word is present in the same meaning in the Native American language, it turns out that the real root is Turkish. This dictionary has hundreds of examples from **Sanskrit** as well.

3- On top of that, **when we find and show the sound change laws in the transition of Turkish roots to other languages**, the level of evidence increases. The "it's a coincidence" defense becomes ridiculous when we show seven or eight examples for a law of change. Moreover, we show 30-40 or even 70-80 examples for some laws. **Adnan Atabek** is the best at discovering the laws of sound. Also I added some laws to his. Of course, all of them are open to scientific discussion. As long as we condemn the attitude of deliberately "not seeing, hearing or speaking" the clear evidence;

4- The maps and dates of the ancient migration routes of humanity, based on genetic studies published in the last 30-20 years, show the same truth. The most developed and comprehensive of these are the publications of **Anatole Klyosov**. Articles and books in this direction confirm the partnership codes that we have revealed in the field of the language. And our evidence also confirms theirs. For instance, the American geneticist and anthropologist **Spencer Wells**, who has been writing his works long before, but whom I have recently come across one of his work, obviously confirms our theses.

5- The same partnership is already present in cultural codes, legends, religions, monuments, rugs, clothes, music, symbols, etc. ;

6- An important part of the Turkish words common with Western languages are also common with Turkish dialects living thousands of kilometers away from each other and speaking in separate countries. They developed in a conceptual unity between dialects and within the same dialect. They branched out and formed clusters. This diversity, unity and tendency to cluster is absent in other languages for many words. This is the proof that Turkish is the main root for those words.

7- Turkish is an agglutinative language like other ancient languages Sumerian and Hittite. Agglutinative languages are the ancestors of the others. In another study, I showed that many features of Turkish grammar live in languages called "Indo-European".

8- The similarity of the Turkish Orkhon alphabet to the Etruscan and Latin alphabet. Full harmony of the Latin alphabet with Turkish. A complete harmony that is not found in other languages in terms of writing and voicing words. The pointedness and steepness of the letter 'i' in this alphabet and in Turkish; The intense presence of the letter 'o' in words showing roundness...

I present these eight points to your attention separately for you to examine.

This dictionary is actually the work of about 300 authors who have worked hard on the subject. I can't write here all names, but some of them are below. If I later add the references section, they will all become visible.

Authors from Türkiye: primarily **Adnan Atabek**, Konstanty Borzecki (Mustafa Celalettin Pasha), Bedros Efendi Keresteciyán, İsmail Hami Danişmend, Osman Nedim Tuna, Vecihe Hatiboğlu, Adile Ayda, Kazım Mirşan, Ünal Mutlu, Haluk Tarcan, Polat Kaya, Osman Karatay, Nüvit Alagöz, Abdullah Gürgün, Çağıl Çayır, Osman Sertkaya, Murat Karamüftüoğlu ... Yusuf Has Hacip, Kaşgarlı Mahmut and of course **M.K. Atatürk**.

Foreign writers, primarily **Norm Kisamov**, Illich Svitych, Sergei Starostin, Wilhelm Radloff, Allan Bomhard, Mel Copeland, Georgeos Diaz-Montexano, Anatole Klyosov, Mario Alinei, Olcas Suleymanov, Irek Bikkinin, Çingiz Garaşarlı, Murat Adji, Strahlenberg, Vilhelm Thomsen, Martti Rasanen, Snurre Sterlesson, Sven Lagerbring...

And also many friends who are not authors but have contributed... Thanks to all of them.

Turkish equivalents of common words are highlighted in **red**, while others are presented in **bold**. Examples from Native American languages are displayed in **CAPITAL** letters.

Have a good reading...

That's a pretty superficial, weak claim. The Old Turkish root we recommend fits perfectly: '**erk**' (power, authority, power to rule). Also See "Archaic" item

**ardent, ardour, ardor** (Eng.): **arzu**. '**Arzu**' is said to be Persian. But 'ar' here may be related Turkish '**ört**': burn, fire. Like in '**arson**' / **ırık** (wish) > **arzu** > **eros** > **irade** (A. Atabek) (-k > -s,z sound change rule)

**arduous** (Eng.): **hard**, **sert**, **zor**. Turkish 'art' means high mountain passage. **Ard**, **hard** < **sert** < **hartı**, **kert** (hard)

**are** (Eng.): Turkish '**dır**'. *They are writers:* **onlar yazar-dır-lar** (Kisamov) / **dır**, **lar** > **are**

**area** (Eng. - Latin): Turkish '**ara**': place between two things, distans. '**Yer, ir**': earth, ground, terra (Orkhon) / **Yer** > **area** (i. H. Danişmend)

**argil** (Eng.): **kil** / **kes- ker - kil**: **kil**, **clay**, **argil** (A. Atabek) / **Hlina** (Hittite): **kil**

**argue, argument** (Eng.): **yargı**, **yargı** (argument – Nişanyan), **tartışma**, **hır**. "from Latin *argumentum* 'a logical argument; evidence, ground, support, proof,' from *arguere* 'make clear, make known, prove'. Sense passed through 'subject of contention' (1590s) to 'a quarrel'" (OED). / **Argument** < **jargu**, **yargı** (*argument*) (Ü. Mutlu) / Another opinion: **Arku**, **arqla** > **argue**. **Argue**: *Türkic*

**arqu-**, **arqula-**, **aryula-** (v.) "discord, disagreement, strife". Ultimately fr. a polysemantic verb **ar-** "separate, part" for a piece that bridges two parts, *a:ra* (n.) "middle, center", its deverbal noun derivative **arqu**: "ravine (valley)", and finally its denoun verbal derivative **arqula-** "sow discord", lit. "cause ravine" between two sides. (Kisamov)

**aria** (Eng.): "from Italian *aria*, literally 'air'. **Air** (Eng.): 'melody, tune, connected rhythmic succession of distinct musical sounds, 1580s, nativized from Italian *aria*' (OED). '**Ir**, **yır**, **ırla-mak**, **yırla-mak**': sing, song (DLT-1073) / *Oratorio* < **ır** (Ü. Mutlu) / **Ariya** (Hittite): oracle, to study an oracle, ask an oracle. **Ira**, **ıra-ma**: sing, shaman sing, bard sing / **IRA** (Native American): sing >< **ır**, **yır** / **Arrane** (Celtic): **ır**, **ırla-ma** / **Viru** (Sanskrit) <> **ırla**, **yırla**

**arrive** (Eng.), **reach** (Eng.), **erreichen** (Gern): **er, er-mek, eriş-mek**. So called explanation of '**arrive**': Ad-Ar (Latin prefix) + rive: coast (OED). **Ar** < **er** connection is already obvious. '**Ar**' root – Sanskrit - : 'to bring near, to reach, obtain'. **Erebu** (Akkad): arrive, **swareo** (Celtic): **er, var ... Var**: reach, arrive

**arson** (Eng.); **ardebit, ardere** (Latin): fire, burning. Old Turkish '**örte, örtən, od, ot, ates**': ignite, fire, burn ... ; '**ört**': fire; '**ürt**': fire, exciting, excited (Radloff)

**art** (Eng.): **urtur**: sculpt, carving (Old Turkish - Orkhon). See "Arch" item. **Art** (Turkmen): peel, to carve, to shape (Ünal mutlu, Yavuz Seyhan). /

**Arthur, King Arthur**: '**artarttur**: be rise / **Artur** (Turkish name - More in Azerbaijanis), **Artuk** (a Turkish commander's name, **Artuk Bey** (Seljuk Sultan, governer of Jerusalem) / King Arthur is said to be of Etruscan origin (Geoffrey of Monmouth) / **King Arthur** < **Kengu, Kengeş** (of the congress) + **Artur** / Sanskrit '**artha, arha, artagani**': wealth, money... / Arthur is a Turkish name to its fingertips. Means

"giver, donor" in Turkish. Arthur is buried in a Turkic 'kurgan'. His son's name '**Amr**' (**Amhar**) is a Turkic name. **Amr** > **amrak** (darling, beloved) > **amor**. For those who think the 'Amhar' link as a fabrication, let's give them his other son: '**Duran**'. There are hundreds of thousands of '**Turan, Duran**' in Türkiye (basic information from N. Kisamov).

**artus** (Latin): close, **ört** (close); narrow, narrowing (**dar, darlaştırma**) / **art** > **ört** >< **dar** > **narrow**

'**Seki, sekü**': **scene**, step, terrace, high place; **sekü** (elevate) (Mong. – Nişanyan). Western sources parse "ascend" as 'a-scend' by separating it from its prefix, like many other words. 'A': direction indicator, 'scend', Latin 'scan', to rise, to climb. Thus, the word is freed from roots that overlap with Turkish. Another example of prefixed Latin and English

words that are very similar to unprefixed Turkish... While the words were being formed or transferred from language to language, they either took Turkish roots and added prefixes, or they were integrated into Turkish words with their suffixes and roots. But there is no way out for these Western fabricators. / **As**: *rise (se lever, s'lever) (Fr.)*; **as-mak**: *suspendere; ağmak, ağası, yir: ascension* (H. R. **bode** (Eng.): **bode** (v.) “**augur**” ~ *Türkic bodı* “insight, achievement of perfect wisdom”. Ultimately fr. a *Türkic* root **büt-**, **büt**, **püt-**, **püt** (v., n.) conveying mystical notions “believe, deity”, “pray, prayer”, “revere, idol, icon, cross”,

"refer, truth, fact, verity". The Türkic word belongs to a class of grammatically most archaic, distinguished by homonymic noun-verb pair and neutrality to transitivity. It was a primer of a word, not a tongue yet, in Skt. *bodhi* "enlightenment, awakening". Time has erased in Eng. linguistic traces of the past religions supplanted by the later doctrines, leaving behind only monuments of the old cultures. The term *bodi* is a **Buddhist** religious term of Türkic extraction, with vast spectrum of Indian derivatives: **Buddha**, *bodimant* "throne of enlightenment", *bodisatva* (*bodhisattva*) "enlightened (*bodhi*) being (*sattva*)", etc. Few of them rolled into a Türkic syncretic lexicon. The first **Buddha** brought a Buddhist enlightenment to India. He was a Türkic Saka extract, a Scythian "prince" Shakyamuni (6th c. BC), of the **Saka (Saxon)** Kurgan tradition. The Türkic *bodi* underlies the entire Buddhist lexicon. **Cognates:** A.-Sax. Buddhistic *bodi-* derivatives: *bod* "command(ment), message, precept, preaching", *boda* "messenger, herald, prophet, apostle, angel", *bodere* "teacher", *bodian* "foretell, announce, proclaim, tell, preach", *bodiend* "proclaimer, teacher, preacher", *bodic* "command(ment), decree, ordinance", *bodscipe* "message, command", *bodong* "message, recital, preaching, interpretation", *bodungdaeg* "Annunciation Day"; secondary internalizations: OSax. (*gi*)*bod*, ONorse *boð*, Gmn. (*ge*)*bot*; Balto-Sl. (Lith.) *budeti* "awake", (OCS) *bludet* "be alert, follow"; Skt. *bodhati* "awake, watchful, observe", *buddhah* "awakened, enlightened", *bud* "Buddha" (and "planet Mercury"), Av. *bütaj* "name of one of the demons"; Pers. *but-* "idol, fetish" (also "beloved, sweetheart"), pwt- "Buddha"; Kor. *mitta, mide, midin* (မိတ်) "believe, trust". **bogus** (Eng.): fake / **Bögüš** (adj.): “*phony, sham*” ~ *Türkic bögüš* (n.) “*understanding, comprehension, misunderstanding, miscomprehension*”. IE etymology rated “*origin is unknown*”. Quasi-scientifically, it is explained as a “*folk speech*”. A nominal suffix *-s/-š* expresses negation (OTD 661, 663), i.e. “*misunderstanding, miscomprehension*”; it is “*rare*” (*in eastern languages, thus a guest from the western languages*). (Norm Kisamov)

**Brutus**: He was the first English king to give his name to Britain. From **Geoffrey of Monmouth**... "Historia Regum Britanniae, completed c. 1138, contains the first narrative account of **Arthur's** life. This work is an imaginative and fanciful account of British kings from the legendary **Trojan exile Brutus** to the 7th-century Welsh king **Cadwallader**" (Wikipedia). According to Monmouth, English Kings are descendants of **Troy** (and Etruscan) lineage. *Geoffrey of Monmouth, Historia of the Kings of Britain, Tr: Aoron Thompson, Rev: J. A. Giles, in Parentheses Publication, Cambridge Ontario, 1999.* This is another form of confession of these Turkic roots English people. One of Brutus' sons is named '**Kamber**'. This is a Turkic name, and the name of the **Cambria** region originates from him. Another individual from the royal lineage is named '**Gurgustius**', which is also a common Turkish name, '**Korkut**'. Brutus comes from the lineage of the Trojan hero '**Aeneas**'. This also aligns with Turkic '**Eney**' (Ç. Garaşarlı), and again Turkic Arabic names '**Enis**', '**Enes**'. "**Druids**" name has also Türkik root. According to Western sources, it means permanence and solidity, derived from the tree. **Durable, tree**... Turkish 'kes-mek' / **Kesmek**: *caedere, caessio, caessum* (Latin) (*B. Keresteciyan*). **Keazo** (Greek.): **kesmek** (Ü. Mutlu). *Caesar, Kaiser, gazi* (ghazi, veteran) connection (Ü. Mutlu)

**Caesar**: "The name is of **uncertain origin**; Pliny derives it from **caesaries** "head of hair," because the future dictator was born with a full one..." (OED) Caesar is known to be Trojan – Etrusk origin. When Caesar was born, he was with full 'hair': '**caesaries**'. Its name comes from the word 'hair': **caes** (**caes** < **sac** – Turkish). Another myth is that Caesar was given birth by cutting his mother's womb. The term cesarean section surgery ( **caes** <> **kes** – cut ) comes from there. The imperial names **kaiser** (German) and **char** (Rus.) also derive their origin from here (OED). Here, let me quote from Çingiz Garaşarlı's book "**Trojans and Etruscans Were Turks**": "The work titled '**The History of the Kings of Britain**', written in Latin by the ancient English historian **Geoffrey of Monmouth** in **1136**, sheds better historical light on the issue of the Trojan settlement in Britain. It is clearly stated in this work that the Trojans migrated to Italy and Britain after the Trojan War. According to what is told in the work, after **Brut**, a descendant of the Trojan hero **Eney** (Eneas), came to Britain with his tribe in the 12th century BC, his nation and country were called Britons and Britain after him. It is also said that Brut's son named **Kamber** led the Britons living in Wales, and after his death, the Welsh called themselves **Kambri** after him. The personal name **Kamber**, one of the oldest Turkish personal names, is

of the same origin as the word Kambar and is derived from the personal name **Kamböri** in the **Kazakh** Turkish heroic story. There are great similarities between the personal name **Gurguit** of the Briton dynasty and the personal names **Korkut**, **Kurkut**, **Korkit** of the ancient Turks. Geoffrey of Monmouth also wrote in his work that the old name of London was **Troi Novo**. What Roman Emperor Gay Yuli **Caesar** said about the British is also interesting. Caesar said that the ancestors of the Britons and the Romans were the same, that both nations were descendants of the Trojan Brut and that they were the descendants of the Trojan Eney."

**cumulus** (Eng.), **cumulo** (Latin): **küme, kümelenme**. '**Küme**' is relatively new in Turkish, but there are many similar words in Old Turkish. According to Osman Nedim Tuna, '**gukin**' (Sumerian): **ökümene, ökün, Ökün**: heap of money, roses etc. ; **öküm**: heap; **üg**: to pile, stack; **öküş**: many, abundance; **kömek**: people, folk; **kamak**: to pile (DLT). From M. Ergin, '**ökül**': get together, be heap ... / **Kombul** > *cumulus* (Latin) (B. Keresteciyen) / **Kımı** (Altai., Tel. Kumd. Bar.):

collect, wrap; **cumul** (Kirghiz): get together; **cumşılık**: union (Radloff). So Arabic – Turkish 'cumhur - cumhuriyet' (people, public, republic) are related to Old Turkish **kamu**, **cumul** etc. **Cem**, **cemaat**, **cümle**, **cami** etc. (society, all, whole, mosque)

**cunado** (Spanish): brother-in-law / **cunado** < **kayın** (a relative in law) (Sibel Küçükoğlu)

**cunning** (Eng.), **callidus** (Latin): **kurnaz**. **Kalt** (Kirghiz), **kultung** (Tel.): cunning (Radloff)

**cup**, **cuppa** (Eng. - Latin): **kap** (container, vessel, pot, bowl etc.). "Old English: from popular Latin cuppa, probably from Latin cupa 'tub'." (Oxford D.). **Kap** (DLT), **kap** (Orkhon) / Sumerian '**ḡab**' means basket; German '**korb**', Turkish '**kap**' (M. İ. Çığ); **küp** > **cupa** (Latin) (B. Keresteciyen) / **Kap**, **cup** (Latin) relation (O. Süleymanov) / **Kappu** (Akkad.): **kap**; **h(g-k)ubsasu** (Akkad.): bottle - **şise**, **kap** / **Kappi** (Hittite): pot, **kap** / '**Kapkagag**' (Sumer): utensils <> **kapkacak** (O. N. Tuna)

**dash** (Eng.): tire, trattino, short line as a punctuation. **Dika, dağ, deş** (Sumer.) > **dot, dash** (A. Atabek)

**dash** (Eng.): " ... probably from a Scandinavian source (compare Swedish *daska*, Danish *daske* 'to beat, strike'), somehow imitative" (OED) / Sumerian '**tag**':

*throw, put on the ground* (M. İ. Çığ). / **Tasta, taṣta**: throw (Radloff); ‘taş, daş’: stone

**dawn** (Eng.): **tan** (dawn, twilight, daybreak) / Sumerian 'dag': bright, dawn (M. İ. Çığ) / ... "dauen," 'to dawn, grow light,' shortened or back-formed from dauinge, dauing 'period between darkness and sunrise,' (c. 1200), from Old English dagung, from dagian 'to become day,' from Proto-Germanic \*dagaz (- **doğuş** -) 'day' (source also of **German tagen** 'to dawn;' see day). Probably influenced by Scandinavian cognates (Danish dagning, Old Norse dagan 'a dawning')" (OED) After knowing that there is a Sumerian word called Dag, which means **Tan**, don't these explanations seem very inadequate to you? However, the root words they mention are exactly same with Turkish '**doğ'**, '**doğuş**' and '**tan, tang**'. **Tag** (German): day, **doğ, doğuş** (rise, sun rise) / **Dnkui, dnkuai, dankuis, dankui, dnkudr** (Hittite): dark, black. **Tün**: dark, evening / '**Dag**' (Sumerian): day break, dawn, **tan** (O. **de-** (Latin, English): negative prefix. In Turkish similar. Turkish '**değil**': not, no. **Çevir, ç-e-vir**: turn ... **devir, de-vir**: overturn

**dead, death** (Eng.), **töten** (German): In Old Eurasian Turkish dialects, dead, death: **ütir, üdür, ödür** (Radloff)

**deaf, dump** (Eng.): Turkish **deme** > *deaf*; **dumb** > **taub, dumm, stumm** (German) > *thyma* (Fin.) > *tüp* (Bulgarian Slav.) > *tuli* (Indonesia.) > *dülli* (Mong.) (A. Atabek)

**deal** (Eng.): Turkish '**dil'** (*cut to piece, slice – and so, ‘share’*) **Deal**: “**cut to pieces**” **deal** (n.1) “*a part or portion,*” Middle English *del*, from Old English *dæl* “*a part of a whole, a share;*” with qualification (great, etc.), “*an extent, degree, quantity, amount,*” from Proto-Germanic \**dailaz* (source also of Old Norse *deild*, Old Frisian *del* “*part; juridical district,*” Dutch *deel*, Old High German and German *teil*, Gothic *dails* “**part, share, portion**”), from PIE \***dail-** “**to divide**” (source also of Old Church Slavonic *delu*, Lithuanian *dalis* “*part*”), perhaps a Northern Indo-European extended form of the root \**da-* “*to divide,*” or perhaps a substratum word. (Norm Kisamov)

**dear** (Eng.), **theuer** (German): **değerli, değer** (worth, value). Old Turkish ‘**tegir**’ (portion, value) (Nişanyan). Old English *deore* 'precious, valuable, costly, loved, beloved,' from Proto-Germanic \**deurjaz* (source also of Old Saxon **diuri**, Old Norse **dyrr**, Old Frisian *diore*, Middle Dutch *dure*, Dutch **duur**, Old High German *tiuri*, German *teuer*), of **unknown etymology.**' (OED). It is told about literally Turkish ‘**değer**’, but unknown etymology! / **Daeger** (Swedish): **değer** (Ö. B. *Etili*), **dear** > **değer-li** (Ü. Mutlu)

**decorate** (Eng.); **decus, decorare** (Latin): Claimed “PIE root” is ‘**dek**’. “*to take, accept*” OED (?). Turkish ‘**dik, dik-mek**’: rise, erect, built, construct, sew ... Heykel **diki** ... Bayrak **diki** ... Perde **diki** ... (erected a statue, erected a flag, sewed a curtain ... )

**dedicate** (Eng.): **adamak. Demek**: tell, dico, dicare ... **Dikmek**: for example, “erecting a statue in memory of ...” See alleged “PIE root” “**Deik**”

**deduct** (Eng.); **decurrus, dejectus, decidio** (Latin): They all mean "downwards". Turkish '**düş, düş-mek**': fall, decrease, descent, slump, subtraction, deduction ... / Some Latin and English words, which seem to deviate from Turkish roots with their prefixes, are in full harmony with Turkish roots when pronounced and interpreted as a whole. I created a pretty long list of these words. This requires a more careful review of the concept of prefixes in Western languages. Some of the prefixed descriptions are fabricated.

**deem** (Eng.): According to Kisamov Turkish '**de, de-mek**' (say, tell) is related to this English word. Another meaning of the '**de**' is 'to consider, to assume, deem'.

**deep** (Eng.): **derinlik, derin, dip** (bottom, end). "Germanic origin; related to Dutch diep and German tief, also to dip" (OED) / **Diup** (Swedish): **dip** (Ö. B. **deik**: "PIE root", "to show," also "pronounce solemnly," "also in derivatives referring to the directing of words or objects". Turkish '**de, de-mektell**, to talk, to declare, to order... Some of English words that are claimed to originate from this root: **addicted**; avenge; benedict; **condition**; **contradict** (**karşı de**); dedicate; **dictate**; **diction**; **dictionary**; dictum; **digit**; **disk**; edict, index; **indicate**; interdict; judge; paradigm; policy; preach; predicament; predicate; **predict** (**bir-ön de**); prejudice; revenge; **teach**; **toe**; token; verdict... / **diction, dictum** < **de-mek**. **Toe**: Turkish '**toynak**' (animal nail)

**dek**: "PIE root". Although it is claimed in the OED source to mean "accepting, taking", the examples of words given are mostly about 'to stand up' or 'to stand upright'. Here they are: **condign**; dainty; **decent**; **decor**; **decorate**; deign;

**dignify; dignity**; diplodocus; **discipline**; disdain; docent; docile; **doctor**; **doctrine**; document; **dogma**; dogmatic; heterodox; orthodox; paradox... / **Dik**: upright; **dik-mek**: erect, perk, raise; **dik durmak**: stand upright; **dikilmek**: stand.

**delgos** (Celtic): thorn, **del, delici** (drill, piercing); **diken** (thorn) / needle: **TL'AA** (N. American)

**delh**: “PIE root” pain, ache. **Dolor, dolores** (Latin): from “cutting, chopping”.

'**Del, del-mek**': drill, bore, pierce; '**dala, dala-mak**': bite, hurt, ache

**delirium, delusion** (Eng.); **deliratio, delirus, deliramentum** (Latin): Its origin is shown as "**de-liris**": going astray. Turkish '**deli**' goes directly into the situation as insane, without adding a prefix or anything. Western sources attach later prefixes and roots to some Western words with Turkish roots. / **Deli** (mad, crazy) / **Delü-delülik** (Dede Korkut, 1300) / *Delirium* > **delirmek** (M. C. Pasha) / **Telir, telirt, telilis, telimze** (Kar. Tel. Schor. Altai): stupidity, nonsense (Radloff) (in the purest Eurasian Turkish dialects these words used hundreds of years ago. The Oghuz people had them in the 1300s. How could they learn those sophisticated English and Latin terms?)

**Delling** (Old Scandinavian, Old Germanic): God of dawn and son of Dagr and Nott. **Doğ**: rise

**delve** (Eng.): search, search radically. (v.), **del-** (v.), “cut into” ~ *Türkic del-/tel-, deš-/teš-* (v.) “pierce, punch, break through” (Kisamov) / Also Turkish ‘**dil**’: slice, cut into pieces

**dem, dom-o** : “PIE root”, house, household. Old Turkish, New Turkish ‘**dam**’: roof, house; ‘**tam**’: wall. Some of the words that are claimed to originate from this root: Anno Domini; **belladonna**; condominium; **dame**; **danger**; dangerous;

**despot; domain; dome; domestic**; domesticate; domicile; **dominate**; domination; dominion; domino; **Donna**; dungeon; **ma'am; madam**; madame; **madonna**; predominant; predominate; **timber**; toft... **Domus** (Latin)

**Demioergoi** (Greek): '**demirci**' and '**erk**' Turkish roots here. Relating to the artisan, free city class. Its slightly different spelling means God. God is the shaper, the master. Blacksmith God. The relationship with the Turkish words '**temir-demir**' is obvious. Since the sanctity of the 'blacksmith' is frequently emphasized in Turkish mythology, it should not be surprising to find such a connection. (H. Tarcan) / '**Temir, demirdemircierkergDemioergoi**.

**demos** (Greek): common people. About democracy, epidemic, pandemic ...

**Teba** > *demos* (*t* > *d*, *b* > *m*) (A. Atabek) / **Teba** (Turkish > Arabic): people under an authority ... is it Arabic origin? No ! The root is Old Turkish '**tab, taptümen**

**dharma** (Tibetan – Indian – Eng.): One of several fundamental concepts of Indo-Tibetan Buddhist religious philosophy. It has meanings such as supporting, lifting, maintaining. In fact, it is the concept that forms the basis of religious understanding. '**ter, der, der-mek**' in Turkish: to gather, to organize, compile; '**dernek**': meeting, consulting, conducting, conversation... Likewise, there is a possible historical connection with concepts such as '**dirim**': life, vitality and nature. Since the Turks hold an important place among the creators and first leaders of Buddhism, it is not a coincidence that we find the connection between these concepts and the Turkish, but natural and functional. / The overlap of the word **dharma** with '**Torah**' < Turkish **töre** (custom) / **Darm** (Uyghur): lehre, teaching (Rasanen) / **Dar, dür** (Ottoman, Kazakh, Mong.): right time, right gravity, balance, ratio (Rasanen). / “PIE root” ‘**derbh**’: to put together, wind < Old Turkish ‘**ter, der, dermek**’: bunch, compile (O. **Esir (Æsir)** (Old Scandinavian, Old German): *Proto-Indo-European language, Germanic mythology is ultimately a development of Proto-Indo-European mythology. (...) A number of Germanic gods are mentioned in Old Norse literature and they are divided into the **Æsir** and the Vanir. The chief god of the **Æsir** is Odin, a god associated with war, seiðr (witchcraft), and wisdom. He was probably worshipped primarily by kings and noblemen rather than the common people. Odin is the lord of **Asgard**, the abode of the gods, which includes the majestic hall **Valhalla**, where warriors who died a heroic death in battle (Einhverjar) were admitted in order to prepare them to help Odin in the coming Ragnarök" (Wikipedia).* They claim that **Æsir** pantheon's name is Indo-European, supposedly! This Indo-European exists without even splitting off, without emerging; it's the Turkic '**Oz**', the spirit united with God. Its symbol is

the Turkic '**Oz Tamga**' (Swastika), with a history of at least 20,000 years, evident from its prevalence among Native Americans in Central America. Turkic '**Öz, es, esen, esin**' means 'essence, wind, soul, well-being, inspiration'... **Oz** > **Esus** (Celtic) > **Jesus**... / "*Æsir is the plural of áss, óss 'god' (...) "The word Ásgarðr is a compound formed from Old Norse: áss (god) and garðr (enclosure). Possible anglicisations include: Ásgarðr, Ásgard, Ásegard, Ásgardr, Asgardr, Ásgarth, Asgarth, Esageard, and Ásgardhr"* (Wikipedia). **everywhere** (Eng.): **her yer**.

**evil** (Eng.): *Evil* (*adj., n.*): "harmful" ~ *Türkic uvul-, opul-, öpel-, öpül-, uyul-* (*v.*) "collapse, squeeze, subside, suck in, swallow", where the *ul-/el-/ül-* is a passive marker "sucked in, etc". The verbal stem **uv-** "crush, grind, rub, wring" has a very physical origin, probably associated with food and material processing, but its derivatives also carry metaphorical notions, the form **uvul-** conveys an abstract notion of "demise, demised", perpetuated to posterity by Tr. and Gmc. languages. Cognates: A.-Sax. *yfel* "bad, evil, wicked, wretched, worse", OSax. *ubil*, OFris., MDu. *evel*, Du. *euvel*, Goth. *ubils*, OHG. *ubil* "evil", Gmn. *übel*; Hitt. *huwapp-* "evil". The minor phonetic dispersion attests to fairly late migratory scattering, probably by the 2nd c. BC Sarmat refugees escaping assault of invaders from the Central Asian interfluvial (Yablonsky L. et al, 2010) that created the European Sarmatia and Germania; the uniform distribution among the diverse Gmc. languages makes the late origin from the Western Hunnic phylum unlikely. (Kisamov)

**evolution** (Eng.), **evolvere** (Latin): **Evrim**. **Eüril**, **awril** (Tara. Küar.): **evolve** (Radloff) / **Evril**: evolve

**ewe** (Eng.): Turkish **ebe**, **epe**: mother. *Turkish 'eve'*: mother (Kisamov)

**ex-** (Eng. – Latin): Prefix. Turkish '**çık**, **çıkış**, **eksilmiş**, **eski**' (exit, lack, minus, negative, old, ex etc.) / **Ek**: extra / **Eski**: **ex**

**exact** (Eng.): Old Turkish '**çak**' (**çaq**): just, here, same (DLT). In Türkiye Turkish it is still present at local saying (TDK). '**Ancakan-cak**) / Claimed "PIE root" is "**\*ag-**" "to drive, draw out or forth, move" (OED). (?) So, '**Act**' < '**ak**, **akış**' (movement)

**Excalibur**: the legendary sword of the legendary **King Arthur** ... "... from Welsh **Caledvwlc'h** probably a variant of the legendary Irish sword name **Caladbolg**. Caladbolg which might mean literally 'hard-belly', i.e. 'voracious.' For the first element, see callus; for the second, see belly." (OED) Poor Western etymologists, they don't know Turkish. Besides, they must exert so much effort to hide what they don't know and invent things from thin air as much as they can. '**Kılıç** > **calad**' is sword in Turkish. It comes from the root '**kıl**' (cutting). It passed into Latin as '**gladius**.' In Finnish, it's '**kalpa**'. On the other hand, why would the roots mentioned in the OED explanation lead back to Turkish again, just like all roads lead to Rome? **Callus** < **kalın**; **belly** < **bel**; **hard** > **kartı**, **hartı**... / Dozens of different swords are mentioned in numerous Old Turkic epics. Some can cut stone like Excalibur, which is embedded in stone. Those that, when struck against the ground, spring forth the water of immortality. Those that are fire by night and water by day... Those that come out of their sheaths on their own and converse with their owners, offering them advice. Those that extend to the length of a tree during battle... Those have souls, dying when

defeated: You choose... Some heroes are born from stone with swords in their hands. In the Kazakh 'Parpariya Epic,' the hero has a sword named '**Ak Beren**' (Excalibur?), which means 'White Sword' (Serginbayev 2007). Similarly, in the Kazakh '**Alankay Batır** Epic,' Alankay's sword '**Aksemser**' comes out of its sheath on its own to warn Alankay of impending danger (Bayram 2004) (6). From this, we understand that the '**Ex**' in '**Excalibur**' could very well be Turkish '**Ak**,' meaning 'white.' The '**bur**' in '**ex-cali-bur**' should be '**ber-en**'. **Beren** > **bur** / **Beren**: strong, powerful, best quality steel / **Ak-kil-beren** > excalibur / "PIE root" '**ghelGhel** < **kıl**

**excavate** (Eng.); **excavo, ecfodio** (Latin); **kratzen** (German): **kaz, eş** / ex-cavate

**gembh**: “PIE root”, “**tooth**, **nail**.” (OED) A hidden but solid root relationship with Turkish. But the intelligence that cannot see the obvious similarities will never be able to see it. It is claimed to derive from this root: **comb**; gem; oakum; messy. It can also be connected with Turkish '**gem**': bit, bridle. Turkish '**kemir**' (**gnaw**), '**kemik**' (**bone**) show same root partnership. ‘Comb’ is related to the tooth, the appearance of the teeth and gnawing. They say so. / **gembh** < **kemik**, **kemir**, **gem**

**gena** (Latin): **chin**, **çene**. ‘**Çigne**’: chew. Both of them real Turkish (Kipchak, Cagatay, at least since 1300 recorded). / **Yanak** (**cheek**) > **gena** (**Latin**) (**B. Keresteciyen**)

**Geri, Freki** (Scandinavian, Old German): In Germanic - Scandinavian mythology, on both sides of the great deity Odin, two divine wolves that guarded him and his realm are portraied. “... ‘*Geri*’ (meaning ‘the greedy one’) and ‘*Freki*’ (‘the ravenous one’) constantly guarded Odin so that no one could do him harm. While *Geri* would sleep, *Freki* would control the situation, and vice versa, ensuring Odin and the entirety of Valhalla remained safe” (*Viking Herald*). One is 'the greedy one,' the other is 'ravenous,' both terms meaning 'greedy'! What remarkable creativity! At least they could have said 'freaky'. Mythology relies on half-truths and half-fabrications. Yet, the methods and pathways of fabrication also exhibit a clear cultural and genetic connection. Therefore, the fabricated parts also have some basis in truth. However, there should also be a limit to constantly making things up. Let's preserv the essence of mythological truth while fabricate. Here, the white wolf referred to as '**Geri**' (the white one) is Turkish for '**Kır Kurt**' (grey wolf). '**Kır**': white, gray, light gray... '**Kurt**': wolf.

'Freki' (the black one) should either be the 'barak' (dark-colored, heavily furred large dog) or directly 'böri' (wolf, beast). 'Barak' is also a sacred dog, it runs very fast because its mother is a bird. Turkish 'böri' has become 'bear' in English. Additionally, 'börk' (furry leather hat) has become 'beret'. Moreover, it has transformed into 'furry', 'furious', 'brute', and 'brutal'." Turkish 'pars, bars' is another beast (leopard). Bars > leo-pard; böri, bars > bear, brutal...

**kurgan, Kurgan Hypotesis** (Eng.): Old Turkish '**kurgan**'. "1889, from Russian, originally a Tatar word." (OED) The Kurgan hypothesis (also known as the Kurgan theory or Kurgan model) is the most widely accepted proposal to identify the Proto-Indo-European homelands which the Indo-European languages spread out throughout Europe and parts of Asia." Wikipedia. Isn't it a joke? The name of the theory created to describe the existence and origin of the Indo-European Language Family is Turkish. Kurgan clearly comes from '**korugan, koru-mak**' (protected area, protected building, to save, to guard). Even though they are mound graves in the sense most known to foreigners, they also have other meanings in Old Turkish, related to protecting, hiding. Kurgan is mentioned in the Inscriptions in the sense of '**kale**- castle', also '**kurikan**': tent (M. Ergin). **Kurgan** also means monument, mausoleum-tomb. "Russian, of Turkic origin; compare with **Turkish kurgan** 'castle'." (Oxford D.) / **Kurta** (Hittite): town, castle, city; Akkadian '**kirḥu**' / **Kourat** (Yakut): city; **haretz** (Hebrew): land, mother land; **Karak**: city (A. **'gayet'** (Kutadgu Bilig – 1069) (Arabic and Persian root ?): very, much, **quiet** (pretty) / The examples given with the suggested root are not in harmony with each other. In this case, why shouldn't these Turkish equivalents be considered?

**kwell**: "PIE root", "revolve, move round; sojourn, dwell." Their meanings are somewhat broad and varied. We are concerned with the meanings of '**kal**, **kal-ma**: stay, remain, sitting; '**kaldır-matoprağı 'kal-dır-ma'**). Here are those words: accolade; ancillary; atelo-; **bazaar**; bicycle; bucolic; chukker; **chakra**; **collar**; collet; colonial; **colony**; **cult**; **cultivate**; **culture**; **cycle**; **cyclo-**; cyclone; encyclopedia; entelechy; **Kultur**; pole; pulley; rickshaw; talisman; telos; **torticollis**; wheel... **Colony** > **kalma**, **kalım** / cultur > **kaldır**, **kal** (?) / By what logic is a Turkish-rooted word like "**bazaar**" shown as an example of this root? Unbelievable. It shows once again how unreliable Western etymological sources are.

**kwetwer**: "PIE root", "four." **Quod** > **tetra** < **dört**. Turkish '**dörtkırkquarantinekırk**) day isolation practice. Kar.): side, **seite** (German) / **Near, next < yakın, yan** ... There are not many words in English (or in Latin) that start with the syllable “Ne”. But the Turkish equivalent of most them starts with ‘Y’. Subsequent consonants are usually ‘n-g’ or ‘k’. I suggest this rule. There are enough examples to create a rule: neck: **yaka**; nephew: **yeğen**; new: **yengi**, **yeni**; near: **yakin, yan**; next: **yan**; neigh: **yan**; negative: **yok, yadsıma**; nefas: **yanlış**; necnon: **yne, yanı sıra**; needle: **yigne, iğne**; negro: **yağız**; nest: **yuva**; naked: **yalıng** ... / near: Native American **XAN, JİXAN** <> **yan, yakın**

**nebula** (Latin – Eng.): **bulut**, cloud / **Empula, mpula** (Laz.) / **Koumoul, kommol, nel, neal, scamal, neul, bodjal, niaul** (Celtic) / **mpula** <> **bulut** > cloud > **koumoul, bodjal** / **nebula** > **mpula** < **bulut** <> **nem** (damp)

**neck** (Eng.): **boyun, ense, engse, yaka** / Muineal, muin (Celtic): **boyun** / Avestan ‘manaoθri-’ <> **boyun**, neck / neck < **yaka** ( ‘Y’ > ‘Ne’ rule ). Perfect overlap: There are about 100 words in English (also Latin) that start with ‘Ne’. Nearly half of them have a rule. Turkish equivalents begin with ‘Y’ followed by ‘n-g’ or ‘k’. Strange but true... I suggest this transition rule for from Turkish to Western languages. Some of them: nephew: **yeğen**; new: **yengi, yeni**; near:

yakın, yan; next: yan; neigh: yan; negative: yok, yadsıma; nefas: yanlış; necnon: yine, yanı sıra; needle: yigne, iğne; nest: yuva; nicht: yok; null: yok ...

**Odin**: The greatest god of the Scandinavians and Vikings. God of war and fire. / *"The origin of the name Odin, the European God of War, is the Turkish word **Od**/Hot. Many words with meanings such as fire, rage, anger, rage, hostility, grudge come from the root **Hot/Ot/Od** in European languages as well as in Turkish. The root /**Od** has settled in European languages not only as the name of God, but also as many words related to their meanings in Turkish. We know that the word **Od/Ot** in Turkish is the root of many concepts meaning both fire and earth. There is a constant connection between the meanings of fire and earth. "The name of the Earth Goddess of the Turks and Mongols comes from the root **Od - Ot**: **Ötüken - Etügen**. The Sun God of the Sumerians is **Utu**. **Ud/Ut** means sun, fire and time in the Sumerian language." (D. Perinçek) / See "**Hot**" item / So, who is '**Odin**'? He is the great deity of the Vikings and ancient Germanic tribes. It has origins in Old Turkic '**od**, **ot**' (fire). **Od** > **hot** are related. Its oldest form is the Sumerian sun god '**Utu**' (Shamash). Words like '**oda**' (room), '**atrium**', '**hut**', and '**otur**' (sit) are related to each other. **Odun** > **wood**. Many words carrying meanings such as fire, anger, rage, enmity, and hostility come from these roots in European languages, just as they do in Turkish. The sacred homeland of the ancient Turks and the Earth God '**Ötüken**' should also*

be considered in this context. There is also a Sumerian God-King, the ancestor of '**Odin**': **Utna-Pishtim**. It's a Turkic name that means 'baked on fire.' A manifestation of the cult of the sun. / **Sven Lagerbring**, the father of Swedish historiography, wrote clearly and with very specific expressions in his work "The Similarity of Swedish to Turkish", written in the form of a "letter to **Ihre**", that **Odin was Turkish** and that the **Scandinavians were of Turkish ancestry**. 1700's. In writing these, he relied on his own research and was influenced by the writings of Snorre Sturlesson. **Snorre Sturlesson** is the father of the Icelandic sagas. Like his teacher **Are Frode**, he wrote that Odin was Turk, and that Northern Europeans (including the British) were descended from Turks. (1100s and 1200s.) / It is also claimed that the name **Odin** comes from the river '**Udun**' in the Caucasus (O. Karatay).

**regal** (adj.): Turkish **arıy** (adj.) rex or righ / Latin origin from rex ‘a king’. Thomas Stratton claims the opposite. He states that the name Adiatorix, a governor of Galatia is of Celtic origin. Thus, according to his opinion, the last syllable – rix is a common termination of the names of Celtic kings and chiefs, and is the Gaelic righ, from which is derived the Latin rex (Stratton, 53 // Stratton, T. (1870). *The Celtic origin of a great part of the Greek and Latin languages, and of many classical proper names, proved by a comparison of Greek and Latin with the Gaelic language or the Celtic of Scotland* (2nd ed.). Edinburgh.). In actual fact, a word rex or righ is of Turkic origin. Thus, Yu. Drozdov considers that all names of Gothic kings like **Alarig**, **Ardarig**, **Atalarig**, **Gadarig**, **Germanarig**, **Gunerig**, **Teodorig** and etc. are formed by a single grammar scheme: a nickname plus a word arig or erig, which is corrupted form of ancient Turkic word **ariy** (**arig**). In this context the word is translated as ‘a noble’. It was not a title, but an honorific title, which was characteristic to the upper family class. He states that a word ‘rex’ is corrupted ancient Turkic word **arig/ariy** – ‘noble’, ‘pure’ (Drozdov, 115 // Drozdov Yu. N. (2011). *Turkic-speaking period of European history. Litera.Yaroslavl*). F. Agasioglu mentions a name of Saca tribes’ leader **Khanaziruk** (Agasioglu, *Ancient Turkic land*, 16). One can say that this name consists of three words: ‘khan’, ‘az’, and ‘iruk’, where a word khan/ceann in Irish and Turkic languages means ‘a leader’, a word az is a name of this leader and **iruk** is a word ‘rig’, i.e. ‘a king’. So, the name of Saca tribes’ leader **Khanaziruk** could be translated as ‘a King Az/Aza’ (As’ King). If we take into consideration a Turkic etymology of the name, then it could be translated as “a noble ruler Az/Aza”. (Kisamov)

**regime** (Eng.): diet / **Oruç** > **regime** (The Turkish root loses its initial letter as it passes into Western languages. – A. Atabek ) / **Oruç**: fast

**reign** (Eng.), **regnaturi** (Latin), **reich** (German): They are about Turkish **erk** (power, authority), **irade**, **doğru**, **dik** ... “PIE root”: “**reg**”... see “**Reg**” item / “**irade**’ (*volition, will, will power*) is said to be Arabic rooted. But it’s not. Originally Turkish word: **İrik** (*wish, will*) > *irade*” (A. Atabek) / According to Kisamov its root is Turkish ‘**arig-iruk**’ (*noble – pure*). See “**Regal**” item

**retard** (Eng.), **tard** (Eng.): **gecikmek**, (**dur-mak**). Old Turkish **tärträ**: unfit, failed (Orkhon) / **Tardu** is about Old Turkish ‘**durmak**’. **Dur**: to tarry (i. H. Danişmend) / **Dur**: stop, remain

**robe** (Eng.): it’s a root ‘cut’. Turkish ‘**urba**’ (clothes). Turkish **erpe**: cutting (Kisamov). Turkish ‘**or**’ root denotes ‘cut’, for example ‘**orak**’: sickle / **Urba > robe (initial ‘R’ rule – A. Atabek)**

**rocket** (Eng.): Its origin is the Italian ‘**rochetto**’, which is the bobbin used in the production of yarn and fabric. This name was later given to the ‘**rocket**’ due to its shape. They say that its root is Norwegian ‘**røkkr**’. We think its real root is Turkish ‘**öreke**’. **Öreke > rochetto** ... Adnan Atabek wrote, some of the Turkish

words lose the initial vowel when they are transferred to Western languages. If you ask why '**Öreke**' is the first source, it is the only one that can express the verb 'knit': **ör**.

**roll** (Eng.), **rollen** (German): **oro** (Altai, Tel. Küar. Kirghiz): roll, turn, roll up / "Turkish words whose second letter's is 'r' have a rule of dropping the first vowel when transferring to the West. **Öreke** > roka, from here the word **rocket** was derived. **sabot, saboteur, sabotage** (Eng.): "*Many sources show the most literal version of this word as "sabot" and write that the words derived from this word are taken from French. However, the word **sabot** itself is a word taken from Turkish*

through Arabic. *Sabbat*, in other words '*sandal*' that comes from Arabic has been defined as the root of the word. The Turkish word '**çabat**' (*çabata, sabat, sabbat*) is derived from the verb '**çabu**' (chop), which means to cut, to chop, and while it used to mean 'shoes made of a piece of wood', Old French accepted this word in its original meaning: 'Shoe made from a piece of wood', **sabot**. The root of the Russian word '**choboty**' is based on the same Turkish word, '**çabat**'. In Spanish, this word is used by the Turkish tribes who settled in this region during the Arab Caliphate Period in Spain. It is taken from this language and today it is called '**zapata**'. (Bikkinin)

**sack** (Eng.): Turkish **sağdak, sadak**: hunting bag, arrow bag (Kisamov) / **Maşak, mesik, mösök, mesane** > **vesica** > **pouch** > **bursa** > **sack** (A. Atabek)

**Saga** (Eng. - Old Scandinavian, Old Germanic): “*Saga, is one of the prose narrative genres in Viking, German, and Icelandic literature of the Middle Ages. Broadly defined, the term "Saga", " encompasses all kinds of prose stories or historical narratives (saints' lives, translations from other languages, or non-religious stories). The word ‘Saga’, derived from the Icelandic verb ‘segja’ meaning ‘to tell’, has the dictionary meanings of ‘something told, something said’*” (Wikipedia). We've reached the heart of the matter. So, what's going to happen to this Turkish roots? **Söyle** > say > **saga**; **sak** (mind, wisdom, wise) > **saga, sagacious / Sagu** (Old Turkish, **Kaşgari**, DLT): elegy for the dead epic, saga

**saga** (Eng.): Old Turkish '**savga, sagu**': lament, epic, saga (DLT – 1073) / **Saga-i** (Hittite): omen, sign, warning. **Sagu**: lament (O. Sertkaya)

**sagacious, sagacity** (Eng.): clever, intelligent, insightful, wise, wisdom. Old Turkish '**sak**': mind, wise, wisdom, head (DLT), (Orkhon) / **Sak-, sākki, sakk, sak-sk**: to know (about), to experience, to heed, to pay attention

**sage** (Eng.): wise, **eke, öke** (clever, wise). Old Turkish **saq**: mind, head

**sagitta** (Latin): **ok**, arrow. Old Turkish '**sağdak, sadak**': arrow bag

**sagum** (Latin): soldier cloak. **Seknu, sekna** (Hittite): cloak. **Kepenek**: cloak, shepherd's cloak / **Saginnah** (Scythian): **kepenek**, protects from rain (**sağanak**); **şakatu** (Sumer): **kepenek**, cloak (A. Atabek)

**sagus** (Latin): message, notice. **Sava** > **sagus** (B. Keresteciyen) / Old Turkish '**sav**': say, word, talk, declaration, opinion

**saiga** (Eng.): Turkish **sayga**, steppe antelope

**sail, sailing** (Eng.): According to Kisamov Old Turkish ‘**salla, salın**’ (wave, swing, swing in the sea) is at the root of ‘**sail**’. Already Old Turkish ‘**sal**’: raft, float is the root of ‘sail’ (Norm Kisamov)

**sak**: “PIE root”, sacred; **sacer, sacra** (Latin). ‘**Saklı, sakla**’: hidden, secret, hide, cover, protected. Old Turkish ‘**sak**’: mind, wisdom, head... / Hittite ‘**saklai**’: ritual, custom / **Sakta**: (Altai, Tel. Leb. Kirghiz, Crimea...): protect, withhold (Radloff)

**sale, sell, sold** (Eng.): Turkish **sat, satış** (*sale, selling*) (Kisamov)

**salico** (Celtic): bunch willow, **salkım söğüt**

**salio** (Latin): jump, spring. Turkish ‘**sal**’ root is a movement, action root. For example ‘**saldırı**’: attack, assault, jump on ... **Sal, salmak**: throw (DLT); **sal**: send, leave, release / **Salmak** > *salio* (Latin) (B. Keresteciyen); **salkın**: **sapan, sling** (Eng.) (B. Keresteciyen).

**saliva** (Eng.): **salya**. This word, which is claimed to be of Greek origin, is also of genuine Turkish origin. Both because of the “**su**”: water connection and because of the “**sal**” connection. For “**su**”, see “**Sub**” item. “**Sal**”: release, release water. Already the Turkish partnership with the American Native and Hittite languages proves this clearly. / **Salya** > **salive** (Fr.) (B. Keresteciyen), (Ü. Mutlu) / **Saligai** (Hittite): spit, to spit, spit out / saliva, **salya** >< **SAE, ZAEK** (Native American)

**sans** (Fr.): -less, Turkish ( **-siz**, **-sız** ). Sans livre: **kitapsız** (bookless)

**Santa Claus**: The concept of **Santa Claus** is traced back to **Saint Nicholas** of **Demre** (in Antalya of **Türkiye**). If Santa Claus, a winter, snow, and polar figure, is indeed from Demre, then the reindeer-powered vehicle is a perfect invention for frequent travel from this warm region to the cold regions of the north. Why the intense pressure to create a hero of cold countries from a warm region of retired vacationers? Yet, the original version already exists in Turkish, Kyrgyz, and Kazakh cultures as '**Ayaz Ata**'. The Russians also have a similar figure: **Ded Moroz**. Their tasks are the same, but the fees they receive is very different. Santa Claus works for a very high salary. Unfair competition. According to mythology, St. Nicholas was bringing presents to poor girls so they wouldn't be prostitutes! (3). It appears that St. Nicholas or St. Claus hasn't been doing his job well for a long time. In Turkish, '**Ayas, ayaz**' means moon cold, moonlight cold, which refers to cold. **Ayas** > **ice**... They attributed even the legend of **Hyperborea** to Ancient Greece! Ancient Greece heard it from Turkic tribes. Where is Greece, where is the North Pole! Even the word '**bora**' > borea is 100 percent Turkish. It originates from the root '**bur**'. A kind of tornado, swirling storm, snow, blizzard. / **Santa (sacret)** < **san** (title, respect); **sacret** < **saklı** (privy, protected)

**Scythians:** The great Swedish historian **Sven Lagerbring** wrote: "Turks, like many other related peoples, were nomads. That's probably why they were called schyther (Scythians), inspired by the Hebrew word **schut**, meaning "wandering nomad" ... Oden first stopped in Germany. From there he moved on to Denmark and stopped in Sweden... This is **Sturlesson**'s (father of sagas, 12th century) own narrative and gives full reason why German, Danish and Swedish are essentially the same language. The origins of the Anglo-Saxons, the ancestors of the English, likewise date back to Oden. Their language is also a branch of the language of Asians and Turks." (Abdullah Gürgün) / In Turkish, this name is referred to as '**Saka**', '**Saga**' or later '**İskit**' (Sycthian). It is claimed that this name comes from the Turkish word '**sak**' (head, mind). Because of their distinctive high hats (**börk** -?). Regardless of where their name came from, they spoke Turkish and lived in a characteristically Turkish culture. Genetic studies have repeatedly shown that they are related to other Turkish tribes. Scythians were also the ancestors of the **Huns, Kipchaks, Sarmatians** and **Caucasian** peoples. / Until the conquest of Istanbul, European scholars and people had no doubt that Scythians were Turks. Even they accept them as their own ancestors and loved them. However, before the traces left by **Attila** were erased, the Turkish conquest of Istanbul and the increase in religious hostility reversed this trend. Many religious fanatics who determined the European ideology, especially **Cardinal Piccolomini**, known as **Pope Piu II**, reignited the hostility towards Turks. Pope Piccolomini was shouting that the Turks were barbarians of Scythian descent and that they should be expelled from Europe. (Çağıl Çayır) / What an irony that the situation changed again after the Indo-European theory emerged. Scythian dominance over "Indo-European"

languages was very evident. The Scythian language was considered one of the ancestors of European languages. But on one condition: the Scythians were no longer Turks and they did not speak Turkish.

**swag** (Eng.): **yağma** (loot) / S-wag < **yağma** / The 'S' law, see "Scab" item

**Swastika**: Old Turkish '**Oz'**, **Oz Tamgası** (**Oz** Stamp). "Greek cross with arms bent at right angles," 1871, from **Sanskrit svastika-s**, literally "being fortunate," from svasti-s "well-being, luck," from su- "well" (from PIE \*(e)su- "good," originally a suffixed form of root \*es- "to be") + as-, root of asti "(he) is," which also is from **PIE root \*es-** "to be." (OED) / The main root Old Turkish '**oz**': great spirit, '**es**': spirit, essence, wind ... **Oz Tamga-sı**: The sign, which is the first form of the swastika. One of the oldest Proto-Turkish symbols. It symbolizes the lineage and the reunion of the soul with the great soul. / **Adolf Hitler** wanted to choose a powerful symbol for his diabolical purposes. He knew that the Swastika was much older, more impactful, motivating, and much more frightening than the Christian cross. He didn't hide his sympathy for the Turks either. However, in the end, those who raised the red flag over the **Reichstag** were Turks fighting at the forefront of the Red Army: **Rakhimzhan Qoshqarbaev, Aleksei Kovalev, Abdulkhakim Ismailov...** The Hammer and Sickle cross was the new form of the Swastika and the classic cross. How much does Jung's theory fit into **Lenin**'s admiration and acceptance of this flag figure, given that he didn't take his own Turkic lineage into consideration? To me, it is clear that **Jung's hypothesis** has been confirmed.

**swear** (Eng.), **schwören** (German): Old Turkish '**sav**': statement, thought, opinion; '**söyle**': say; '**söv, sök**': curse, swear

**Vikings**: *Vikings came to the Russian-Kipchak steppes in the early 9th century.*

*They call the Swedish/Norwegian fjords they came from **Vik**. Swedish etymologist Strahlenberg and the father of Swedish historiography, Prof.*

Lagerbring establish a relationship between, Turkish '**bük-**', and Germanic **biegen**. Biegen means to bend (**bük**). Did the Vikings from Vik come from **Bük**? **Vik** is the equivalent of the Turkish word '**bük**'. Its meaning is the same as fyord: Bay. The **Bük**-Vik relationship suggests B>V transformation. Famous linguist Strahlenberg, in his works comparing languages, concluded that Turks "must have lived as a single people many years ago" with Goths, Celts and French... In the Swedish Etymology Dictionary published in 1922 by Olof Hellqvist from Lund University, Sweden, it is stated that the name **Viking** is derived from the root **Vik**. Vikings are those who come from **Vik**, that is, **bük** = bay. There are those who claim that the bay they came from is the **bük** at the end of the Black Sea/Azov sea, based on the interpretation of Swedish epics. The fjords where they live on the shores of the Atlantic Ocean are also called **vik=bük**. Those who came from **Vik/Bük** became known as **Vering / Baring / Vareg** in the Black Sea steppes, Byzantium and the Arab world. However, the name **Veren/Beren** came long before them. In the north of the Black Sea, the name **Verig** is found not only among the Huns but also among the Tatars. Again, Bulgarians, one of the Northern Black Sea tribes, have a ruler named **Virağ**... **Berendis** is the name of a Turkish community living in the steppes of Southern Russia in the 11th century during the Kipchak (Cuman) age. As Gumliliev emphasizes, they also use the name **Barani**. Do you think it's a coincidence that Verings have the same names as in Byzantine sources? **Berendis/Baranis** are mentioned together with the **Pecheneg** and Tork (Oghuz) tribes in Russian annals. Most of the **Berendi** clan entered Hungary together with the **Pechenegs** and settled there. It cannot be determined with certainty which of the Oghuz, Pecheneg and Kipchak communities this Turkish tribe belongs to. Hungarian historian Rasonyi says that this tribe may not originally have been Cumans. **Berendis** (11th-13th.) give their names to many places in the regions where they lived for centuries. A

*large swamp in the Vladimir province of Russia bears the name of **Berendi**. In 1097, the name **Berendi** was also encountered as a personal name among the Uz/Oghuz people in the same geography. Whether **Berendis** are Cuman or Uz, the word comes from the root **Ber/Ver** and its suffixes are Turkish: **Ber+en+di**. The meaning is the same, just like **Väring (Viking)**, brave, loyal and self-sacrificing. Berendis in Antalya and Karaman... **Berendi** tribes also came to Anatolia. The **Berendi** tribe was found in some settlements in the 16th and 17th centuries. The names of the Vikings in the Kipchak/Russian steppes are **Vering**, **Varyag** and **Varang**. The Byzantines call them **Barang**, the Arabs call them **Ei-Baring**. (D. Perinçek)*

**Yule** (Eng.): Noel, Christmas, literally Turkish ‘**yıl, yılbaşı, yeni yıl**’ (year, beginning of the new year, new year) / *Turkish ‘yol’*, English **Yule** (n.) “winter holiday” ~ *Türkic yol* (n.) “road, way”, as a winter holiday “road, way (of fate)”; *the original full name of the holiday was “Yule Tengri”* ~ “Fate (from) **Tengri**” ~

*“Fate (from) God”, it is celebrated on the winter solstice, with spruce, music, dances, and gift exchanges. Cognates: A.-Sax. geol, geola, Ang. giuli, ONorse jol, Gmn. Yule; OFr. jolif; Modern Fr joli “festive”, semantically extended to “pretty, nice”; Modern English jolly “festive”; Sum. yol “road, way”. In the religious and IE etymological fields, the term is dumbfoundingly rated “of unknown origin”, although it is still active in the Turkic-populated areas, and is sufficiently well described in the ethnological literature. An 8th c. Tibetan inscription from a Thousand Buddhas cave mentioned **Yol-Tangri** “God's Path” revered in the fortress Shu-balyk in Dunhuan. After advent of Christianity in the 4th c., the winter solstice period was reassigned to mean “the 12-day feast of Nativity”, with the advent of Christianity it was transported to Northern Europe, and in the 11th c. it was reassigned to Christmas, becoming a “Christmas Yule”, or “Christmas holiday”. The term is still active in the Northern Europe, with all its traditional trimmings. The Sum. yol attests 4th mill. BC, a long way to the Norse Christianity and Papal edicts. Also notice “**jolly**”.
